Dear friends,

the “International Surgical Course of the Italian Society of Arthroscopy 2008” will take place in Friuli Venezia Giulia on February, from Thursday 21 to Sunday 24. This region is at the border between Italy, Austria and Slovenia: thus disclosing the aim of our Society to rise the partnership with the neighbouring countries’ orthopaedic surgeons.

The intensive live surgery’s program will match one, as much intensive, including relive surgeries, instructional courses, “around the master” meetings. This year the live surgeries will be performed about knee and shoulder, being planned other joints for the next editions.

The Organising Committee cordially welcomes you to 3rd International Surgical Course which we are honoured to host in Udine for the Live Surgeries and in Tarvisio for the Scientific Meeting.

We look forward to receiving your registration on and to seeing you in Friuli! Yours sincerely,

Enrico Gervasi
Course Chairman

Riccardo Minola
S.I.A. President

How to reach Tarvisio

The Tarvisiano region enjoys a unique location: embedded in the north-eastern corner of Italy – bordering Austria and Slovenia – Tarvisio is located along one of the main European thoroughfares: the Vienna-Venice-Rome line. It is then extremely easy to reach Tarvisio both by public transport and your own car.

By train:

Tarvisio Boscoverde train station (abt. 3 km from the town centre) is very well connected for several day- trips to Udine, Trieste and Venice in Italy, and to Villach, Klagenfurt and Vienna in Austria.

Numerous trains depart every day from Udine to reach Tarvisio in about 40 minutes.

Besides, three trips a day directly connect Venice to Tarvisio, making it easy to reach the town from every corner of Italy.

The same number of trips also connect Tarvisio Boscoverde to Villach – from where it is possible to reach the main Austrian cities – Klagenfurt and Vienna (which can be reached in about 4 hours).

By car:

Highway A23 Alpe Adria serves the whole Tarvisio area with the exits of Pontebba (from where you can reach within 20 minutes Passo Pramollo-Nassfeld), Malborghetto-Valbruna and Tarvisio (the last exit in Italy).

The A23 is a branch of the A4 Turin-Milan-Venice-Trieste highway: reaching Tarvisio by car is then the most comfortable thing one could imagine. From any city in north Italy it only takes a little more than a couple of hours to arrive in Tarvisio. For those coming from Austria or Slovenia, nothing could be easier: Tarvisio is the first exit in Italy, connected to the main highways in both countries.

By plane:

Tarvisio is right in the heart of the new enlarged Europe and it is well served from the main airports of middle Europe. Trieste, Klagenfurt and Ljubljana are only less than one hour away by car or train, whilst Venice and Munich airports connect Tarvisio to the main European cities.
